

## Joomla and World of Warcraft

Joomla is a powerful open source content management system thats FREE. Its used to power sites ranging from big companies to personal hobby sites, like web sites about world of warcraft or clan web sites. It even has free tools like plugins for Thottbot that you can use.

Out of the box, Joomla! does a great job of managing the content needed to make your website sing. But for many people, the true power of Joomla! lies in the application framework that makes it possible for thousands of developers around the world to create powerful add-ons and extensions. Here are just some examples of the hundreds of available extensions:

- Dynamic form builders
- Business or organizational directories
- Document management
- image and multimedia galleries
- E-commerce and shopping cart engines
- Forums and chat software
- Calendars
- Blogging software
- Directory services
- Email newsletters
- Data collection and reporting tools
- Banner advertising systems
- Subscription services
- and many, many more...

You can find more examples over at our growing Joomla! Extensions Directory. Prepare to be amazed at the amount of exciting work produced by our active developer community!
